PROFESSIONAL SCRUM MASTER

The Professional Scrum Master (PSM I) course establishes the core principles and processes of the Scrum framework.

Time: Two days
Register: radically.co.nz/courses
Cost: $1,800.00 per person
Available in private: yes
Certification: PSM I

PSM I is the global standard for Scrum Masters. If you want to learn the world's most popular agile framework from an authority on the topic, this is the course for you. Our course is taught by Edwin Dando who trained under Scrum creators, Jeff Sutherland and Ken Schwaber.

Course Overview

Students learn how to use Scrum to optimize value and solve complex business problems. Tools are provided to help students with the behavioural shifts required to coach and facilitate people, teams and the organization. Students are challenged to think in terms of the core principles of Scrum, increasing their ability to apply Scrum at work. By the end, you will:

- Have a clear understanding of Scrum
- Be able to perform the Scrum Master accountabilities
- Get your organisation underway with Scrum
- Deeply understand servant leadership
- Improve how Scrum is applied in your firm

This is not an introductory course. A base working knowledge of Scrum is required. We recommend you attend our Free Agile Mindset, if you haven't worked in an agile environment. Students can extend the foundations in the Advanced Scrum Master course.

Who is it for?

While PSM is targeted at Scrum Masters, the core lessons are applicable to anyone involved in agile. Scrum forms the basis for most agile approaches, so obtaining a strong base understanding in Scrum is extremely valuable.
If you are responsible for use of Scrum, this course is a good fit

.

Certification

The PSM1 tests student's core Scrum knowledge through a rigorous online assessment, completed after the course. To pass the assessment students require a score of 85% or higher.

Students also receive a 40% discount on the PSM2 assessment, which tests their ability to apply Scrum to solve advanced, complex problems in the real world. We recommend completing our Advanced Scrum Master training course prior to attempting this.

What other people said

This was hands down the best course I have ever attended. I feel really cheated for having done the PSM on my own and not getting the benefits of taking this course. Really well put together and explained and the use of anecdotal learning was phenomenal. Jaime Ginnever, NZME

The techniques taught in this course are relevant, powerful and actionable - and I believe will have a positive impact on our team as we can set priorities and make hard decisions that were, up to now, not being made to the detriment of the product, the customer and the business – Rob MacGregor

The course was presented by Edwin and, from the beginning, you can see that he's really passionate about the subject and has a lot of experience. I found that that the number of real world experience shown during the course really helped me to grasp the concepts and see how I can approach my current company/team. Eduardo Maino – Orion Health

Edwin has an extraordinary command on the subject, illustrated with real time examples, even tips on coaching. Course content was well organized Madhavan Ekanathan - AUT
